

Hazardous Material & Chemical Transportation

Sharpville Container Corporation specializes in the fabrication of United Nations and Department of Transportation (UN/DOT) vessels for the transport of hazardous materials.

We offer the utmost in customized, economic design and reliability for a wide array of food, chemical, beverage and pharmaceutical applications.

The Sharpville Advantage is the ability to design and/or manufacture containers that offer specific solutions for the most stringent applications. This includes a choice of various inlet/outlet configurations with specialty, stackable and four-way designs for forklift handling. These designs will meet UN1A1, UN31A, UN portable standards.
