

General Purpose Container

15 Gallon

Sharpsville Container Corporation conforms to sanitary requirements of the National Sanitation Foundation (NSF). These containers are fabricated from corrosion resistant stainless steel using TIG welding process with complete penetration on all welds. Each container is supplied with an oval closure which contains an integral pressure relief valve and (2) fittings w/dip tube. Containers are pickled to create a satin like finish. There are numerous applications for this design such as: portable eye wash stations, add tanks, spray tanks, product transport tanks, homebrew tanks and more!

15 GALLON

Features at a glance:

- 2B Pickled Finish, Electropolish Finish available
- Design pressure not to exceed 130PSI @ 110°F - Non ASME
- Stainless Steel level tube, dip tube and closure oval provided

Sharpsville Container Corporation operates in a facility with 100,000 sq. ft. and is an ISO 9001 company. We offer a full range of storage tanks, UN/DOT transport vessels, process equipment and high pressurized cylinders. Proudly serving the Chemical, Pharmaceutical, Industrial, Food and Dairy, Pressurized Gas, Environmental, and Beverage industries, SCC is able to provide you with both standard and custom solutions specific to your needs. With a wide range of capabilities and sizes, we integrate our products into complete skidded systems, including piping, pumps, agitation, and controls. Our expertise both in-house and in the field allow us to meet your fabrication and repair needs. Sharpsville Container Corporation is also equipped with the American Society of Mechanical Engineers (ASME) Code certification, United Nations / Department of Transportation (UN/DOT) certification, National Sanitation Foundation (NSF), and the API 650 certification. For ASME projects, we carry the "U," "UM," and the "R" stamp. SCC will also perform field repair and custom manufacturing work.
