

Large Chemical

Our family of large containers are the package of choice for transporting, storing, and processing hazardous materials for PG II and PG III products. Durable stainless steel construction allows our containers to maintain product integrity and promote handling safety. Sharpsville's large chemical containers are also the package of choice for use with high purity products.

Features at a glance:

- 304 stainless steel (316 optional)
- Seamless, welded construction
- Deep-drawn stainless steel ensures volume constancy and safety
- Designed for use with a closed loop system
- Many designs UN approved with 15 psi m.a.w.p. or higher
- Can be ASME code stamped for high pressure applications
- Adaptable to various inert gas blankets (nitrogen, argon, etc.)
- Polyethylene or Teflon lining available

Sharpsville Container is known for high quality fabrication in stainless steel and exotic alloys. Our vessels, whether they are process or transport, ASME, UN, or Heat Transfer are manufactured for the Food, Chemical, Beverage, Petro-Chemical and Pharmaceutical markets. The size of vessels that we manufacture range from 1 gallon to 25,000 gallons. With our standard line and custom design expertise, we are capable of meeting or exceeding your fabrication requirements. Our reputation for quality and service continues to exceed our customers' expectations.
